Abstract of JP11253521

PROBLEM TO BE SOLVED: To obtain a sauna implement which is easily carried, easily usable and foldable. **SOLUTION:** A sauna implement is provided with a storing box 12, a surrounding body, a bottom frame member 14 and a sitting chair 17. The bottom frame member 14 is constituted so as to be stored in a storing box under vertical condition. Both side parts of the back end of the bottom frame member 14 are removably pivoted. A receiving member 26 with a recessed face 26a is respectively fitted on the top sides on a pair of side plates and both side parts of the back end of the bottom frame member 14 respectively have projected parts 14g each having a projected face 14e rotatably fitted to the recessed face 26a and projected part 14g with a constricted face 14f which can be hooked to the front edge part of the receiving member 26. A gap between the front end of the bottom frame member 14 under stored condition and the inner face of a top board 12d is formed smaller than the depth of the recessed face 26a. The surrounding body is provided with a pair of side walls, a front wall, a top wall and a door cover and the front wall is constituted so as to be opened and closed. The door cover and the front wall is constituted in such a way that they are closed by the first and the second slide fasteners formed in series.
